**FOR RELEASE – April 27, 2009**

**New Website Launched to Improve Accountability, Transparency and Success of Projects and Activities**

SAN JUAN CAPISTRANO, CA – ByNet Software announced the launch of a new website aimed at improving the success of people in leadership roles. According to ByNet Software, [LeadersAssistant.com](http://LeadersAssistant.com) focuses on helping leaders of projects and activities more effectively manage tasks, schedules, meetings/events and action items. The website also helps team members be more accountable and their effort transparent to stakeholders.

“We have leveraged years of collective project management experience and implemented the essential tools needed for successful leadership of most activities,” said Scott Shulga, founder and CEO of ByNet Software. “Leader’s Assistant™ enables the leader of an activity or project to focus on what is really important to reach a goal, without requiring significant project management expertise. By using our task and issue status monitoring capability, project costs can be reduced. Using Leader’s Assistant to manage Sales activities, such as the proposal process, can help increase revenue.”

Key features of the product include:

1. A To Do List “dashboard”, generated from the subscriber’s schedule and assignments, improves efficiency when working on multiple projects and “juggling” many concurrent tasks and issues.
2. Community Groups facilitates more effective local and remote team participation.
3. Task, milestone, meeting/event, issue and action item management monitors progress toward successful completion – on time and on budget with a better quality result.
4. Personal and project calendar with timeline ensures the subscriber and the team stay on schedule.
5. Document/file and web link sharing capability provides best communication for remote teams.
6. Activity templates create a highly productive environment by sharing knowledge among the team.

According to ByNet Software, examples of ways to use [LeadersAssistant.com](http://LeadersAssistant.com) are:

- Managing a project using a remote team
- Tracking the progress of new business initiatives
- Providing better visibility of work status to clients and or senior management
- Implementing a training program
- Organizing a campaign or community activity
- Planning an event
